

ABS Lockers

Typical Applications

- Schools
- Gyms
- Swimming Pools
- Hotels
- Water parks
- Golf courses

Locker colors

The lockers are manufactured in several colors. The colors of the lockers in each set can be mixed and matched to suit the requirement. Outside the colors normally produced by JME, special colors can be supplied subject to a minimum order quantity.

Product Overview

The ABS storage lockers supplied by JME are made of highly resistant engineered plastics. The lockers are aesthetically designed and built for durability. The lockers are resistant against rust, moisture and UV light.

Each locker can hold up to a weight of 70 kg. The door has a cylindrical design to give the locker a more pleasant and rugged outlook.

Each locker is identified with a locker number and is secured with a lock. The types of lock include padlocks with or without combination, and master keys; built-in combination number locks. Different types of hasps for holding the locks are available.

If decoration is required on the lockers, decals can be designed and pasted on the locker surface to blend with the environment.

Depending on the usage requirements, the locker has the option of a divider inside the compartment to store more things or each locker can be shared by two users.

Product Dimensions

Product model	Dimension Description (Unit: mm)
A-390L single door	930 x 390 x 500 (high * wide * deep) – each column 2 doors
A-390M single door	620x 390x500 (high * wide * deep) – each column 3 doors
A-390S single door	465x 390x500 (high * wide * deep) – each column 4 doors
A-390E single door	310 x 390 x 500 (high * wide * deep) – each column 6 doors
B-320L single door	930 x 320 x 420 (high * wide * deep) – each column 2 doors
B-320M single door	620 x 320 x 420 (high * wide * deep) – each column 3 doors
B-320S single door	465 x 320 x 420 (high * wide * deep) – each column 4 doors
B-320F single door	372 x 320 x 420 (high * wide * deep) – each column 5 doors
B-320E single door	310 x 320 x 420 (high * wide * deep) – each column 6 doors
C-280E single door	280 x 280 x 400 (high * wide * deep) – each column 7 doors
A series of product specifications	Overall height: 1960mm, upper and lower plate thickness: 30mm, base height: 100mm
B series of product specifications	Overall height: 1960mm, upper and lower plate thickness: 30mm, base height: 100mm
C series of product specifications	Overall height: 2020mm, upper and lower plate thickness: 30mm, base height: 60mm

Different types of hasps and locks

Some of the lockers are supplied with locks already built-in while others are installed with the hasp to hold the padlock. The type of lock to install is dependent on the customer's preference.
